

Emergency First Response

<http://www.chicagolandscuba.com/training.php?lvl=emergency-first-response-cpr>

Many divers take the Emergency First Response courses to meet program prerequisites, such as PADI Rescue Diver, or as preparation for becoming a PADI Divemaster. However, most have also found the EFR program to be important in every day life. They have taken a significant step in emergency preparedness, and feel confident that they can provide care should an emergency situation arise.

The Emergency First Response program meets requirements for CPR and First Aid in the workplace (OSHA Guideline 29 CFR 1910.151), and incorporates the latest procedures for emergency patient care. Other organizations that recognize EFR as meeting their requirements are United States Coast Guard, The Boy Scouts of America, and the American Council on Exercise (ACE), to name a few.

Prerequisites:

No Dive Certification Required

No Minimum Age

What Will I Do?

The course incorporates independent study to prepare you for a classroom and hands-on skill development session with your instructor. You will learn the same patient care techniques used by medical professionals, but at a lay person level.
